

NUIX NEO[®] INVESTIGATIONS

Maximize your investigations resources with intelligent insights and collaboration. Nuix Neo Investigations empowers digital forensics, investigators, analysts and data scientists to see deep into the data, collaborate in real time and speed up the time to find answers within larger and more complex investigations.

The current “data explosion” has resulted in the volume of data analyzed during investigations rising exponentially. Data is created and captured in increasingly complex silos, making investigations for the growing number of fraud, terrorism, human trafficking, cybercrime, internal corporate investigations, harassment cases or IP theft markedly more complex and time consuming.

Nuix Neo Investigations allows corporations, governments and law enforcement agencies to see deeply into the data and streamline investigations. Using powerful AI to extract, classify and contextualize information, identify patterns and relationships across multiple devices and data sources, Nuix Neo Investigations uses deep link-analysis and data connections to give you the right answers in record time.

GET TO THE TRUTH FASTER, EASIER AND SMARTER.

Deployed on the Nuix Neo proprietary platform, Nuix Neo Investigations is designed to handle large and complex datasets, making it a scalable solution that can grow as your investigation needs grow. Nuix Neo Investigations accelerates investigation timelines using AI- tuned solution packs designed specifically for different use cases.

Automate: With the ability to repeat, automate and share workflows you can reduce the time to value.

Uncover the truth faster: Powerful AI classifies and contextualizes data (including documents, communications and media) to quickly identify relevant data and uncover the truth.

Simple to use: Providing a single view across all data, Nuix Neo Investigations offers a user-friendly interface, accelerating the time to answers.

Collaborate: Digital forensic specialists can work alongside investigators and analysts pooling their collective knowledge in real time.

Scale: With the ability to understand unstructured data at scale, Nuix Neo Investigations rapidly ingests and analyzes data, enabling you to quickly connect the dots and reveal the facts.

ADVANTAGES OF NUIX NEO INVESTIGATIONS?

See hidden relationships

Using Nuix Neo Investigations, investigators can see deep into the data and quickly identify how individuals are connected, spot which suspects are most influential and identify hidden connections between people. This includes establishing which targets are communicating, to whom and what data they've shared. Using deep link-analysis and data connections Nuix Neo Investigations can map relationships between people, objects, locations and events to extract key insights and patterns that were previously buried in the noise, bringing critical evidence to the surface.

Collaborate in real-time

No matter the size or scale of your investigation Nuix Neo Investigations brings together all stakeholders within an investigation; empowering digital forensic specialists to work alongside investigators and analysts. The platform provides user-specific views into their data and can scale to support hundreds of investigators and cases securely.

Nuix Neo Investigations allows teams to collaborate in real time, with all eyes on the data as soon as processing starts. Investigators can share case files and reports to pool their collective knowledge in real time. The Nuix Neo platform provides access to remote and non-technical users using an intuitive user interface; all while ensuring your data remains secure with case and item level security. This allows for seamless collaboration and a coordinated approach to investigations, regardless of location.

Maximize your investment

Designed to handle large and complex data sets and interpret unstructured data at scale, Nuix Neo Investigations is a versatile solution that can grow as your investigations needs grow.

Nuix Neo Investigations aggregates data sets from disparate sources, including data from other digital forensic tools you may have already invested in; allowing you to maximize your existing investment. This provides analysts and data forensic specialists with a holistic view of their data and insights from a single view, eliminating data silos caused by using traditional investigation tools.

Go beyond keyword search

Ineffective keyword search can lead to false positives and increased investigation timelines, but with Nuix Neo Investigations you can go beyond keyword searching. Powerful AI classifies and contextualizes data (documents, communications and media) to quickly identify potentially relevant data – reducing the time to find answers and avoiding the false positives associated with keyword-based workflows.

WHO WOULD BENEFIT FROM NUIX NEO INVESTIGATIONS?

Nuix Neo Investigations is the faster, easier and smarter way to filter out the noise and focus investigation teams on the truth.

Whether you are a government or law enforcement investigator dealing with limited resources and growing backlogs or working within a business, navigating the ever-growing number of data sources across platforms or locations whilst adhering to regulation and managing time constrained investigations, Nuix Neo Investigations will give you the right answers in record time.

DO YOU NEED HELP WITH YOUR INVESTIGATIONS?

Nuix Neo Investigations counts some of the world's largest law enforcement agencies, global corporations, intelligence agencies and major regulators amongst its customers. Globally, over 1,800 organizations of various sizes rely on Nuix for complex investigations.
