

NUIX DISCOVER

Conquer the complexities of eDiscovery and legal review with Nuix Discover. Powered by industry leading processing, cutting edge GenAI capabilities, built in automations, and the flexibility to deploy in any environment. Understand your case before review begins and effortlessly review more data with Nuix Discover.

The rising volume and complexity of electronically stored information is overwhelming legal professionals. Unstructured data, huge case data volumes, cost pressures, ingesting challenging modern data types, manual review processes, and the intense scrutiny to ensure no evidence is overlooked, leave legal teams facing burnout, and frustrated by inefficiencies and resource constraints. Privacy concerns and compliance with evolving global regulations further complicate handling sensitive or cross-jurisdictional data. These challenges put immense pressure on legal teams handling eDiscovery and review.

Nuix Discover's connected AI intelligence layer is built directly into review workflows, delivering faster time to insight and more accurate results at scale. **Cognitive AI classifies:** over 500 purpose-built models automatically classify, categorize, and triage every document at ingestion, giving teams immediate insight into what they have and where to focus. Same data, same results, every time. **Generative AI understands:** AI Review scores and prioritizes documents so reviewers focus where it matters most. AI Summaries describe every document in plain language and enable four connected capabilities. Semantic Search finds evidence by meaning, not keywords while Similar Documents surfaces related content the moment something important is found. AI Clustering visualizes the entire case landscape before review begins. AI Chat* allows reviewers to ask natural language questions to rapidly understand the case without reading every page. **Active Learning refines:** Continuous Active Learning (CAL) compounds AI scores with confirmed human decisions to predict relevance, delivering target recall with fewer training rounds.

With AI at its foundation, Nuix Discover helps legal teams uncover crucial evidence reduce unknown unknowns, and ensure comprehensive coverage, with the precision, speed, and deployment flexibility that complex matters demand.

RESPONSIVE REVIEW, DEPLOYED YOUR WAY:

Nuix Discover delivers unmatched flexibility to deploy in cloud, on prem, or hybrid environments, to uncover vital evidence with precision, repeatability and defensibility at scale. Nuix is an established authority for regulators, law firms, and law enforcement.

With Nuix Discover organizations can:

TRIAGE BEFORE COMMIT

Get a rapid overview of your data with an AI powered triage to make confident, informed ECA decisions about what needs to be promoted to review.

VISUALIZE YOUR CASE

See case landscape before review starts with AI Clustering that shows the full thematic landscape of the data in minutes, revealing what is present, where it is concentrated, and what can be immediately deprioritized.

ANALYZE CASE DATA

Get a clear, strategic view of your case data through AI document summarization, meaning based search, conversational Q&A, and predictive coding, so you can act on what matters faster.

AI REVIEW

Harnesses Generative AI to apply coding suggestions, flag documents for human review, and highlight key issues. With precise relevancy scores, natural language insights and document citations, you can gain instant clarity and streamline review.

FLEXIBLE DEPLOYMENT

Cloud, on prem, or hybrid to accommodate any business model. With SaaS deployments offering elasticity in times of large or urgent caseloads.

UNDERSTAND YOUR DATA BEFORE REVIEW BEGINS

With Nuix Discover, you're choosing a solution dedicated to your future. From the moment data is ingested, Nuix Discover Gen AI capabilities give your team instant view of your case:

Document Summaries

Get a plain language AI-generated summary of every document at ingestion, so your team can understand large volumes without opening a single file.

Similar Documents

Discover what you didn't know to look for. When you find a key document, instantly see its conceptual neighbours, surfacing related discussions across custodians and terminology you hadn't anticipated.

Semantic Search

Search by concept, not just keywords. Describe what you're looking for in plain language and surface relevant documents even when custodians use different terminology. Ranked results with a Context Score let you prioritise what's most on point.

Clustering and Visualizations

Visualise how all documents in your case relate to each other on an interactive map, with auto generated topic labels. Identify what to prioritise and what to exclude.

AI Chat: Case Data Q&A*

Have a natural language conversation with your case data. Ask what topics are present, who is involved, and what timeframes matter, then drill deeper with follow up questions. Every conversation is logged for defensibility.

AI Review

Leverages Generative AI to suggest preliminary coding decisions, flag documents for human review, highlight key issues, and provide clear relevancy scores with natural language explanations and in document citations. Identify privileged and responsive materials with unmatched speed, accuracy, and efficiency.

Facet Dashboard

Explore AI Enrichment results combined with standard metadata through interactive cards, combining record types, topics, entities, and sentiment scores to quickly build targeted search populations and decide where to focus review.

Industry Leading Processing

Ingest and analyze vast amounts of case data with ease. Advanced models for clustering, mapping, and graphing transform complex case details into clear, actionable insights.

Multi-Jurisdictional Production

Nuix Discover is engineered to meet multi-jurisdictional production requirements with built in, configurable quality control rules and automation.

Secure and Reliable

Nuix Discover holds globally recognized certifications including ISO 27001, and SOC2. Combined with 99.9% uptime in our SaaS environment, and zero downtime upgrades, it ensures seamless and uninterrupted operations.

WHO NEEDS NUIX DISCOVER FOR LEGAL REVIEW?

Organizations, regulators, legal departments, legal service providers, and law firms use Nuix Discover to power their legal review capabilities with responsible AI and built in automations, deployed in the environment of their choice.

Ask yourself:

- > Can you choose between on prem, cloud or hybrid for your eDiscovery needs? And benefit from responsible AI and automation in your legal review workflows?
- > How do you manage the growing volume of electronically stored information (ESI) that requires legal review?
- > Can your team understand the full scope of a new matter within hours of receiving data, or are you still spending weeks on manual sampling and keyword guessing?
- > Can you chat with your case data*, and get defensible answers?
- > How do you meet multi-jurisdictional production requirements, quickly and securely?
- > Do you know what sensitive data you may inadvertently be including in case data sent to third parties for review?
- > How do you ensure compliance with regulatory requirements in eDiscovery?
- > What is the impact on you or your client for failing to review case data in an accurate, timely manner?
