

LAW FIRM //

NOTICIA LLP: SLASHING EDISCOVERY COSTS BY 75% WITH NUIX DISCOVER AND EXPERT MIGRATION

KEY TAKEAWAYS

75%

COST REDUCTION

Slashed eDiscovery expenses by eliminating per-gigabyte hosting fees and separate processing charges.

0%

DISRUPTION MIGRATION

Seamlessly transferred 100 load files across 22 active cases without interrupting ongoing legal matters.

DEPLOY YOUR WAY

Nuix Discover can be deployed on-premises, cloud or SaaS for complete flexibility and control.

ACCELERATED USER ADOPTION

Deployed an intuitive platform that is easier to use, leading to firm-wide adoption for 100% of eDiscovery needs.

ENHANCED EFFICIENCY

Successfully processes dozens of matters monthly, handling increased caseloads with greater speed and consistency.

AI REVIEW

uses generative AI to automatically rank relevance, highlights key issues, and flag materials requiring human review – to accelerate the identification of responsive or privileged material.

CANADIAN COMPLIANCE

Ensured adherence to Canadian privacy laws with 100% Canadian data hosting and bilingual support.

THE CHALLENGE

Noticia LLP is a Canadian eDiscovery firm and a Nuix partner of over seven years. One of its clients, a major Canadian law firm, was locked into an expensive and outdated legacy eDiscovery platform. Per gigabyte hosting fees, separate processing charges and complex user licensing made costs unpredictable and hard to manage. The platform also lacked native email threading and proper metadata preservation, which compromised compliance with Canadian eDiscovery best practices.

After years on the legacy solution, the team faced slow case processing, inefficient review workflows and heavy reliance on external resources for large investigations. With a growing caseload and increasing case sizes, the legacy system could no longer meet the needs of the team.

The firm wanted a modern and scalable solution that covered the eDiscovery Reference Model (EDRM), so it could build internal capability, rely less on third parties and keep costs under control while working with more consistency and speed.

THE SOLUTION

Noticia guided the firm through a seamless transition to Nuix Discover, with deployment options that included on premises, cloud, or a SaaS solution hosted in Noticia's Canadian data center. Drawing on more than seven years of work with Nuix technology, Noticia's migration team ran the whole process and moved the firm's active matters into its Nuix Discover SaaS environment.

The team handled the format conversions, verified data integrity and transferred all active matters without disruption.

HOW NUIX DISCOVER SUPPORTS THE FIRM

The move to Nuix Discover included several key components:

- > **Nuix Discover SaaS:** A SaaS deployment hosted by a partner, with advanced AI, a native processing engine and legal review technology. All client data was hosted in Canada to meet data sovereignty and compliance needs.
- > **Dedicated migration services:** Noticia's team transferred 100 load files across 22 active cases, with verified data integrity and no downtime.
- > **Claire AI capability:** A proprietary UI extension from Noticia that speeds up the review of thousands of documents across multiple cases.
- > **Flexible deployment:** Nuix Discover can be deployed on premises, in the cloud, or as SaaS.
- > **AI review:** The software ranks relevance, highlights key issues and flags material that needs human review.
- > **Canadian compliance:** Data hosted in Canada and bilingual support helped the firm meet Canadian privacy laws and eDiscovery best practices.
- > **À la carte services:** Technical support and training on demand, without restrictive contracts or hidden fees.

The switch to Nuix Discover delivered immediate and dramatic results. We achieved a 75% cost reduction while improving efficiency across the board. The platform is simply easier to use, which led to exceptional user adoption and a faster turnaround on dozens of monthly matters."

Duncan Fraser, Partner, Noticia

ACHIEVING TRANSFORMATIONAL RESULTS

Since moving to Nuix Discover, the firm has changed how it runs eDiscovery, with results across several areas:

- > **Cost reduction:** Predictable pricing removed per gigabyte hosting fees and separate processing charges, cutting overall eDiscovery costs by 75%.
- > **User adoption:** The interface was adopted across the firm for all of its eDiscovery needs, and the firm now processes dozens of matters each month.
- > **Migration with no downtime:** 100 load files across 22 active cases were transferred with verified data integrity and no downtime.

- > **Shared expertise:** Automation and orchestration let generalists, paralegals, associates and counsel run the same expert workflows, so knowledge was shared across the team.
- > **Everyday improvements:** The firm gained better graphics and visualizations, single sign on and real time processing, which reduced the learning curve.

Nuix demonstrates a deep understanding of what legal professionals actually need. The updates to the Nuix Discover platform are seamless. New capabilities and enhancements are integrated without disrupting our workflow, which is critical in the time-sensitive world of eDiscovery. The platform just keeps getting better."

Philippe Gollin, Partner, Noticia

LOOKING AHEAD

Noticia plans to expand its use of Nuix across Canada, and is looking at more capabilities in Nuix Discover, including:

- > **Audio and video handling:** Adding media review capabilities from Nuix Discover.
- > **Multitenancy:** Extending multitenancy within Noticia's own hosted environments.
- > **More migrations:** Preparing for another wave of over 1,000 case migrations from legacy platforms.
- > **Ongoing development:** Adopting new Nuix Discover capabilities as they become available.

Nuix offers the flexibility our clients need. Whether it's on-premises, in the cloud, or a fully managed SaaS solution like the one we deployed, there's a model that fits every firm's unique security, infrastructure, and budget requirements."

Duncan Fraser, Partner, Noticia
