

NUIX SEPTEMBER 2021 PRODUCT RELEASE

Version 9.4 of Nuix Workstation, Nuix Investigate®, Nuix Enterprise Collection Center and Nuix SDK, version 10.7 of Nuix Discover® on-premises and version 2.10 of Nuix Adaptive Security are now available. This release features key updates designed to help customers work more efficiently with mobile, cloud and remote data sources amongst other product improvements.

Customers with active licenses with a current support agreement can download the latest versions of our software and view detailed release notes on our [Customer Portal](#).

NUIX WORKSTATION 9.4

- **Hancom file support.** South Korean mobile forensic specialist Hancom GMD supports more than 15,000 phone models, vehicle cameras, drones, smart TVs, speakers and home automation devices. These files can now be imported, processed and exported using Nuix Workstation.
- **Forensic Analytics partnership.** Nuix's partnership with Forensic Analytics enables investigators to import additional data into Nuix Workstation, including call data records obtained from warrants to understand the movement of a device geographically by plotting calls, SMS messages and data connections.
- **Federal Information Processing Standards (FIPS) 140-2.** Nuix Workstation, the Nuix Engine, Nuix Imager and Nuix Management Server are now available in FIPS mode, providing US government agencies and customers confidence that data handled by Nuix is even more secure.
- **Slack Enterprise Connector.** Target collections from specific Slack channels or any channel a user is associated with. Collections can include all attachments and links available in a chat, emojis and reaction data, with full conversation threading.

NUIX SDK 9.4

- **Microsoft 365 cloud sources.** Ingest Microsoft 365 cloud sources like Microsoft Teams, Microsoft Exchange and Microsoft SharePoint data through Nuix Engine integrations using the Nuix RESTful service.

NUIX INVESTIGATE 9.4

- **Create Person.** Work more quickly and make more informed decisions by consolidating various accounts (email, SMS, phone number) into a single entity or custodian directly from the Connections Canvas.
- **Enhanced filtering.** Filter voluminous message recipient lists to find specific names within those lists, as well as paginating to better manage chat visualizations including large numbers of senders and receivers.
- **Time zone adjustment.** Easily adjust your time zone to add context to case data from areas outside your own.

NUIX DISCOVER 10.7

- **All Custodians section.** Concisely identify all data for a particular custodian related to a case, including deduplicated files, from the new All Custodians section of the Browse pane.
- **Load Search File tool.** Enter or paste values when using the Load Search File tool without needing to create and browse to a text file. The tool now also supports ID numbers for entities such as Custodian and Person.
- **Binders and Issues.** Administrators can create and populate Binders and Issues during an import, allowed varied uses like categorization of data by load or reorganization of an issue tree via an overlay.
- **Bulk Edit.** Administrators can make changes to settings like IP address rules, server configurations and repository locations across multiple cases at once.

NUIX ENTERPRISE COLLECTION CENTER 9.4

- **Audit trail logging.** Record the actions and activities of software administrators, enhancing internal risk management.
- **Multi-factor user authentication.** Gain additional security against unauthorized access using compromised credentials.

NUIX ADAPTIVE SECURITY 2.10

- **Microsoft 365 Sensitivity Labels.** The Nuix Adaptive Security Rules Engine can detect these labels on documents and emails, enabling identification and evaluation in real time.
- **Device control.** Prevent USB storage and other media devices from being used on an endpoint based on metadata from that device, as defined in the Rules Engine.
- **Drop-down code suggestions.** See available functions and parameters in convenient drop-down suggestions to efficiently and intelligently complete code within the Logic Rules Editor.
- **Centralized endpoint management.** Easily manage the profiles and rules for endpoints across multiple servers via a single interface.
- **Security Information and Event Management (SIEM) workflow.** Using navigable links directly back into specific views and artifacts on specific servers, deployment of tens of thousands of endpoints is now easier and more efficient.

NUIX AUTOMATION 9.4

- **Nuix Automation beta release.** Nuix Automation is a web-based, multi-user tool allowing you to map out and run complex data processing tasks with minimal user input. If you are interested in participating in the Nuix Automation beta program, please contact your account manager.
