

# NUIX NOVEMBER 2021 PRODUCT RELEASE

Version 9.6 of Nuix Workstation, Nuix Enterprise Collection Center and Nuix SDK, version 10.8 of Nuix Discover® on-premises and version 2.8 of Nuix Adaptive Security are now available. This release also introduces the general availability of Nuix Automation for all Nuix customers. Nuix Investigate® 9.6.1 will be available with additional updates in early 2022.

Customers with active licenses with a current support agreement can download the latest versions of our software and view detailed release notes on our [Customer Portal](#).

## NUIX AUTOMATION 9.6

- **Nuix Automation general release.** [Nuix Automation](#) is a web-based, multi-user tool allowing you to map out and run complex data processing tasks with minimal user input and is now available to all Nuix customers.

## NUIX WORKSTATION 9.6

- **Improved Microsoft 365 Security Compliance Center support.** For customers who may not be able to take advantage of the full power of our Microsoft 365 connector due to security constraints, Nuix Workstation now has increased ability to handle PST files downloaded from Microsoft 365 Security Compliance Center. In addition, Nuix Workstation now also supports downloaded Microsoft Security Compliance Center audit logs to help users contextualize details such as who had access to what information and at what time they had access.
- **Expanded 'Promote to Nuix Discover' capability.** Gain more context around Microsoft Teams chat data by promoting chat metadata properties, including Chat Reactions, Participant Visible History Start Time, MemberAdded and MemberRemoved log events to Nuix Discover from Nuix Workstation.
- **Hancom mobile file support.** Building on the addition of Hancom mobile file support in the previous release of Nuix Workstation, Hancom is now a Mobile Evidence type in the Add Case Evidence panel.
- **Apple File System (APFS) T2 decrypted file support.** Nuix Workstation can now process Apple File System encrypted files once they have been decrypted by a third-party tool.

## NUIX SDK 9.6

- **Nuix Core Engine REST.** Developers using Nuix Core Engine REST can now make use of the Microsoft 365 connector endpoint and install Nuix Core Engine Rest to RedHat Linux.
- **Clustering Beta program.** Nuix REST clustering provides a way to distribute your processing workload. Learn more [about the beta here](#).

## NUIX DISCOVER ON-PREMISES 10.8

- **Improved chat review capabilities.** Make more sense of user chats in Nuix Discover. Chat join and leave events and reactions now appear in the View pane if configured when importing

the chat via the API. Also, chat conversations appear in order when sorted by Document Title, regardless of the conversation length.

- **Hierarchy configuration.** Configure hierarchies from user-created text and memo fields for greater flexibility and creativity using this feature.
- **One-to-many field separator.** Import jobs updates now include a default semicolon delimiter for new one-to-many fields and the option to configure the level separator for levels-based Document ID creation.

## NUIX ENTERPRISE COLLECTION CENTER 9.6

- **Remote collection resilience.** Remote collections are now more resilient with several new safeguards, including the ability to resume paused collections to Amazon S3, Azure Blob and local disks.

## NUIX ADAPTIVE SECURITY 2.8

- **Animated screen capture playback.** See what was happening at the time of an alert and make fast, informed decisions with animated playback of screen captures from the endpoint.
- **MacOS support.** Nuix Adaptive Security can now identify and collect files from MacOS devices.
- **Upgraded MITRE ATT&CK rules.** Get up and running quickly with upgraded MITRE ATT&CK rules in the Nuix Adaptive Security rules engine.
