NUIX 101 · ONE DAY INSTRUCTOR LED COURSE

Nuix 101 training is a one-day instructor led course designed to introduce students to the basics of the Nuix Workstation. This beginner course will walk participants through successfully install and configure Nuix Workstation. Participants will create cases and review basic pre- processing options for ingesting different data types. Students will learn core functionality available within Nuix Workstation (Workbench) to view, search, filter, tag, and export data. The class includes multiple hands-on labs that allow students to apply what they have learned during the lecture phases.

- **Prerequisites:** Participants of this course should be able to perform basic operations on a computer.
- **Class Material:** Training manual with lab exercises.

MODULE 1: COURSE INTRODUCTION & PRODUCT OVERVIEW

- Class introductions
- Course objectives
- Nux history
- Overview of Nux technology
- Product installation, configuration & support

MODULE 2: CASE CREATION & DATA PROCESSING

- Software dependencies
- Memory configuration
- Cases
 - Open existing
 - Project scoping
 - Creating a new case
 - Simple
- Adding evidence
- Processing Profiles
- Add/Edit Evidence
- Evidence processing settings
- Pre-filter Evidence
- Processing Details
- Case Statistics
- Creating a Compound Case

MODULE 3: POST PROCESSING ANALYSIS

- Nux Workstation overview
 - Default tabs
 - Results pane
 - View options
- Custodian management
- Predefined filers
- Exceptions

- Exclusions
- Immaterial Items
- Case Deduplication
- Metadata Profiles
- Comments

MODULE 4: SEARCH & REVIEW

- Search Options
 - Search basics
 - Search results
- Query types
- Search Operators
- Search Filters
- Date range
- Word Lists
- Family Logic
- Advanced Search
- History tab
- Tags
- Search and Tag
- Case Notes
- Context

MODULE 5: REPORT & EXPORT

- Charts View
- Reports
 - Investigator report
 - Case Summary report
- Pre-export
 - Metadata profiles
- Export Types
- Export View to File
- Export Items
